#### NEW BUSINESS:

5. Guest: Lisa Hart, Executive Director of the **Neighborhood Council Sustainability Alliance**
6. Discussion and possible motion on Council File 24-0456 regarding PFAS that has been found in LA drinking water.

The motion begins:

In 2023, for the first time ever, the Los Angeles Department of Water and Power detected Polyfluoroalkyl and Perfluoroalkyl Substances (PFAS) in only two water sources within the San Fernando Valley, at the Pollock Well Field, and at the Tujunga Well Field. Fortunately, the recent disturbing detection is from a non-operating well, with results well within the safe zone just recently identified by the federal government. These pollutants known as “forever chemicals” are noted to be directly linked to a wide range of health issues: cancer, liver and heart damage, developmental issues with children and more. The possibility of contamination is serious, especially due to the nature of PFAS, which needs only a few particles per trillion to cause sickness in people and animals.

#### Colorado Prohibits Landscaping Practices for Water Conservation

Colorado General Assembly Concerning measures to increase protections from perfluoroalkyl and polyfluoroalkyl chemicals.

The SCNC supports Council File 24-0456 to create a way to detect, treat, and ensure PFAS and other substances are not seeping into water sources. We suggest that the city take immediate action with respect to testing, neighborhood protection, and holding polluters accountable. Since Artificial Turf is known to contain PFAS which will leach into the ground water—we further suggest The City of Los Angeles ban any further installation of artificial turf grass in residences as well as playing fields.

This motion is to be submitted as a CIS to Council File 24-0456
